

UNIT 5: Display Devices and Electronic Instruments

Syllabus topics: Display Devices: LCD, LED, Seven Segment Display, Alphanumeric Display, Electronic Ammeter and Voltmeter, Digital Multi-meter, Cathode Ray Oscilloscope (CRO), Digital Storage Oscilloscope (DSO).

Question 1

5(a)	With neat figure explain the construction and working principle of a digital storage oscilloscope.	5	CO5	K2, K5
5(b)	What is digital multimeter? Draw the block diagram of digital multimeter and explain functions of each block.	5	CO5	K1, K2

END SEM EXAM 2024-25 | NET-101 | CE/CSE/EE/ET/IT/ME | Q5(a) Construction & working principle of a Digital Storage Oscilloscope, Q5(b) Digital multimeter — block diagram & functions of each block

Question 2

(c)	Explain the functional block diagram of an instrument.	3	4
5.(a)	Draw the working of CRO with proper diagram. Write the measurements which can be done using CRO.	6	5
(b)	Draw the diagram of Digital Storage Oscilloscope and describe its working in brief.	4	5

CO1	To understand the basic concept of diodes, and use the diode as a circuit element in different applications.
CO2	To understand the working of BJT, FET, OP-amp and their applications.

END SEM PYQ's | NET101 | CS/CE/EC/EE/IT/ME | Q5(a) Working of CRO with proper diagram + measurements possible using CRO, Q5(b) Diagram of Digital Storage Oscilloscope + brief working

Question 3

Q4(c)	Explain the construction and working of LVDT.	5	CO4	K2
Q5 (a)	Explain the working LCD.	5	CO5	K1
Q5(b)	Draw the block diagram of Digital Voltmeter and explain it's working by drawing the voltage to time conversion waveforms.	5	CO5	K1

Practice / Model Question Set | NET-101 | Q5(a) Working of LCD, Q5(b) Block diagram of Digital Voltmeter + voltage-to-time conversion waveforms

Course Outcomes (as printed on the source papers)

CO1	To understand the basic concept of diodes, and use the diode as a circuit element for different applications.
CO2	To understand the working of BJT, FET, OP-amp and their application.
CO3	To design the simple digital circuits using different logic gates.
CO4	To identify the errors while making electronic measurements and to understand the working of different types of
CO5	To understand the working principle of electronic instruments and displaying it on electronic devices.
